### **Architect David A. Creech Launches Creech & Associates**

#### **Newest Creech & Associates Project – Huntersville Town Center and Discovery Place Kids – to Break Ground Tuesday, June 9, 2009**

**Charlotte, N.C., June 8, 2009** – Architect David Creech has launched a new architecture firm, known as [Creech & Associates, PLLC](#). The new firm builds on Creech’s 30 years of architectural experience in the region, including the North Carolina Research Campus in Kannapolis, the Energy Production Infrastructure Center (EPIC) building at UNC Charlotte and numerous civic and commercial buildings throughout the region. “All of our projects have and will continue to have a strong emphasis on sustainability and being respectful of place,” said Creech. The firm will focus on civic, higher education, research and development, and commercial buildings.

On Tuesday, June 9, 2009, Creech & Associates along with the Town of Huntersville and Rodgers Builders will participate in the groundbreaking of a 48,000-square-foot, mixed-use center. The result of an intensive facilities and assessment study and master plan by Creech & Associates, the center will include town offices, retail space and Discovery Place Kids, a museum for children. (Editor note: For a rendering of Discovery Place Kids, Huntersville, go to [www.corderphilips.com/pr/huntersville\\_town\\_center.jpg](http://www.corderphilips.com/pr/huntersville_town_center.jpg).)

“The groundbreaking of the Town of Huntersville project is a perfect way to celebrate the launch of Creech & Associates,” said firm founder and president David Creech. “The project will showcase our firm’s expertise in blending classical style with practical yet inspiring design.”

The Creech leadership team has more than eight decades of combined experience. Each member brings a unique perspective and creative talent. Peter Wasmer is known for his leadership of large complex projects like the North Carolina Research Campus. John Crawford has experience in commercial/mixed-use, educational and residential projects; and Brent Green brings expertise in sustainable design and LEED certification.

#### **About Huntersville Town Center**

The 48,000-square-foot project will be comprised of offices, retail space and a new Discovery Place Kids. The facility will feature numerous amenities including a gallery, theater and a learning center.

#### **About Creech & Associates**

Creech & Associates is a Charlotte, N.C.-based, full-service architectural firm offering an extensive range of services across a broad spectrum of holistic and sustainable architectural design. From research and university buildings to town halls and infill mixed-use developments, the firm's approach is firmly focused toward achieving the proper balance of aesthetics, function, cost-effectiveness, environmental consciousness and contextual design. Founded by award-winning architect David Creech, AIA, the Creech team is comprised of experienced, creative professionals whose project work reflects an intimate understanding of the "architecture of place," creating inspiring buildings that are respectful of their environment and place. Creech & Associates is further defined by its roots in sustainability, showcased most prominently in its design of the North Carolina Research Campus in Kannapolis, one of the largest sustainable projects in the Southeast.
